TECHNICAL SKILLS

- Languages:** JavaScript, TypeScript
- Frontend:** React.js, Redux, Next.js, React Query, Ant Design, Shadcn UI, Tailwind, SASS, Framer Motion
- Backend:** Node.js, Express.js, Nest.js, WebSocket, Redis, RabbitMQ
- Databases:** PostgreSQL, Prisma, TypeORM, MongoDB, Mongoose
- Platform/Tools:** Jest, Cypress, Postman, Swagger
- DevOps & Cloud:** Git, AWS, Docker, Linux (Ubuntu), Nginx, CI/CD (GitHub Actions), Pulumi

EXPERIENCE

- NEN Group** [TypeScript, JavaScript, Next.js, Express.js, PostgreSQL, Docker] Tejgaon, Dhaka Bangladesh
Software Engineer - Full time January 2024 - Present
 - Led the development of a full-stack news platform using Next.js and Express.js, designing scalable REST APIs, backend services, and application architecture
 - Architected a full-stack property management solution with PostgreSQL and Docker, focusing on backend scalability, data management, and reliable deployment.
 - Developed and published multiple full-stack portfolio projects on ThemeForest, generating over 250 successful sales.
- Tech Serve4 U** [JavaScript, Node.js, Next.js, MongoDB, RabbitMQ, CI/CD, Socker.io] Michigan, United States
Software Engineer - Full time August 2022 - December 2023
 - Optimized internal applications using Next.js and Node.js, implementing complex MongoDB queries and real-time communication with Socket.io for high-performance data retrieval.
 - Contributed to designing and optimizing a microservice architecture using Node.js and RabbitMQ, reducing inter-service message latency by 25%.
- Ever Expert** [React.js, Angular] Mirpur, Dhaka, Bangladesh
Software Engineer - Intern May 2022 - June 2022
 - Contributed to designing the eCommerce category page at Bazar360 using Angular and SASS.
 - Worked with the Bazar360 team to build responsive UI components, ensuring cross-browser compatibility.

PROJECTS

- Content Processing Platform** [RabbitMQ, Kong API, Keycloak, Redis, PostgreSQL, Docker, React.js]
 - Architected a scalable, event-driven microservices ecosystem leveraging RabbitMQ for asynchronous job orchestration and Kong API Gateway for streamlined routing, ensuring high availability and seamless system decoupling.
 - Implemented enterprise-grade security and real-time synchronization by integrating Keycloak OAuth2/JWT for identity management and Server-Sent Events (SSE) for instantaneous dashboard updates, eliminating redundant polling overhead.
 - Built an 8+ service platform with Node.js, TypeScript, Prisma, and Docker Compose, enabling automated deployment.
- Distributed Report Queue** [Redis, BullMQ, AWS, Pulumi, GitHub Actions, CI/CD]
 - Developed Redis-backed job queues with BullMQ, handling concurrent Puppeteer PDF generation and automated retries
 - Architected AWS microservices using Pulumi IaC with secure VPC networking and S3 Gateway Endpoints.
 - Automated zero-downtime EC2 deployments via GitHub Actions and developed real-time observability dashboards.

Video Stream [TypeScript, Node.js, Express.js, Prisma, FFMPEG, Cloudinary, hls.js]

- Uploads videos and converts them into HLS format with segmented files (.ts) and playlist (.m3u8).
- Stores HLS files in Cloudinary for seamless access and streaming, while adding animated watermarks during processing.

EDUCATION

American International University-Bangladesh	August 2017 – December 2021
Bachelor in Computer Science and Engineering	CGPA: 3.34/4.00
BAF Shaheen College, Dhaka	June 2014 – September 2016
Higher Secondary Certificate (HSC)	GPA: 4.58/5.00

RESEARCH

Melanoma Classification by Using Deep Learning

Domain: Deep Learning

MENTORING EXPERIENCE

Teaching Assistant	September 2021 – December 2021
American International University-Bangladesh	

- Assigned primary classroom and laboratory responsibility.
- Assisted students with their coding problems and debugging.

Mentor	July 2023 – August 2024
Tech Serve4 U	

- Conducted MERN program, delivered content and live sessions.
- Assisted students with technical guidance and real-time problem solving.
