

Rafiur Rahman Protik

Full-Stack Software Engineer | Cloud Deployment

+8801630697009 • rafiurprotik111@gmail.com • Dhaka, Bangladesh

[in](#) LinkedIn • [GitHub](#) • [LeetCode](#) • [Portfolio](#) • [M](#) Medium

Summary — Full-stack engineer with 4 years of experience building and shipping production systems in TypeScript and Node.js. Comfortable across the stack: Next.js and React on the front end, Express and Nest.js APIs behind them, and PostgreSQL or MongoDB underneath. Recent work has focused on event-driven microservices (RabbitMQ, Redis, BullMQ) and on owning deployment end to end with Docker, AWS, Pulumi, and GitHub Actions.

Technical Skills

Languages: JavaScript, TypeScript

Frontend: React.js, Next.js, Redux, React Query, Tailwind CSS, Ant Design, Shadcn UI, SASS, Framer Motion

Backend: Node.js, Express.js, Nest.js, REST APIs, WebSocket / Socket.io, Redis, RabbitMQ, BullMQ

Databases: PostgreSQL, MongoDB, Prisma, TypeORM, Mongoose

DevOps & Cloud: AWS (EC2, S3, VPC), Docker, Nginx, Linux (Ubuntu), CI/CD (GitHub Actions), Pulumi

Testing & Tools: Jest, Cypress, Postman, Swagger, Git

Experience

NEN Group

Software Engineer — Full-time

TypeScript, JavaScript, Next.js, Express.js, PostgreSQL, Docker

Tejgaon, Dhaka, Bangladesh

January 2024 – Present

- Led development of a full-stack news platform using Next.js and Express.js, designing scalable REST APIs, backend services, and application architecture.
- Architected a full-stack property management solution with PostgreSQL and Docker, focusing on backend scalability, data management, and reliable deployment.
- Developed and published multiple full-stack products on ThemeForest, generating over 250 successful sales.

Tech Serve4 U (skillBNK)

Software Engineer — Full-time

JavaScript, Node.js, Next.js, MongoDB, RabbitMQ, Socket.io, CI/CD

Michigan, United States

August 2022 – December 2023

- Optimized internal applications with Next.js and Node.js, implementing complex MongoDB queries and real-time communication via Socket.io for high-performance data retrieval.
- Contributed to designing and optimizing a microservice architecture using Node.js and RabbitMQ, reducing inter-service message latency by 25%.

Ever Expert

Software Engineer — Intern

React.js, Angular, SASS

Mirpur, Dhaka, Bangladesh

May 2022 – June 2022

- Contributed to designing the eCommerce category page at Bazar360 using Angular and SASS, building responsive UI components with cross-browser compatibility.

Projects

Content Processing Platform

RabbitMQ, Kong API Gateway, Keycloak, Redis, PostgreSQL, Docker, React.js

- Architected a scalable, event-driven microservices ecosystem leveraging RabbitMQ for asynchronous job orchestration and Kong API Gateway for routing, ensuring high availability and system decoupling.
- Implemented enterprise-grade security and real-time synchronization by integrating Keycloak OAuth2/JWT for identity management and Server-Sent Events (SSE) for instant dashboard updates, eliminating redundant polling.
- Built an 8+ service platform with Node.js, TypeScript, Prisma, and Docker Compose, enabling automated deployment.

Distributed Report Queue

Redis, BullMQ, AWS, Pulumi, GitHub Actions, CI/CD

- Developed Redis-backed job queues with BullMQ, handling concurrent Puppeteer PDF generation with automated retries.
- Architected AWS microservices using Pulumi IaC with secure VPC networking and S3 Gateway Endpoints.
- Automated zero-downtime EC2 deployments via GitHub Actions and built real-time observability dashboards.

Video Stream

TypeScript, Node.js, Express.js, Prisma, FFmpeg, Cloudinary, hls.js

- Built a pipeline that uploads videos and converts them to HLS format with segmented files (.ts) and playlists (.m3u8), storing output in Cloudinary for seamless streaming and adding animated watermarks during processing.

Education

American International University-Bangladesh

Dhaka, Bangladesh

B.Sc. in Computer Science and Engineering — CGPA: 3.34/4.00

August 2017 – December 2021

Undergraduate research: Melanoma Classification Using Deep Learning — medical image classification.

[Paper](#)

Mentoring

Mentor — Tech Serve4 U

July 2023 – August 2024

- Ran a MERN stack program: delivered course content, live sessions, and real-time debugging guidance.

Teaching Assistant — American International University-Bangladesh

September 2021 – December 2021

- Held primary classroom and laboratory responsibility; assisted students with coding problems and debugging.
